

Excerpt of minutes from The Provincetown Public Pier Corporation Meeting of Thursday, March 10, 2022

Ice Machine Quote Review DB: Gave a recap of the ice machine project. The Pier Corp voted to go with Option 3 (replace the entire 5-ton machine set-up) when it was first presented in December. They have solicited three to four qualified contractors to replace the equipment. Noted prices are subjected to change.

Contractor 1 – Estimated \$49,729 for equipment; a total of \$58,183 including shipping and labor.
Contractor 2 – (Revised price from original quote) Estimated \$58,500; \$3,500 for shipping; \$6,000 for installation.

Both contractors 1 and 2 estimate 10 to 12 weeks for installation.

Contractor 3 – Rescinded bid Recommended they go with Contractor 1 for the price as well as for familiarity.

The replacement cost for this one unit will be covered after two seasons of ice sales. Ice sales make around \$32,000 per year, although this revenue does get absorbed into other expenses. This cost is for existing equipment in current conditions, not for surplus items.
